

## **Electronic Calibration Technician:**

We are looking for a new member of staff to work in our fast paced workshop and calibration lab. The role requires a good understanding of electronic and metrology instrumentation, and the ability to accurately test, calibrate and (minor) repair technical equipment used by our blue-chip clients. You will be working within an existing team in a calibration workshop environment. The successful candidate will be self-motivated, have an excellent work ethic and a willingness to learn. Training will be given in the complex areas and technical aspects of the role which will be both in-house peer to peer, as well as with equipment manufacturers.

The company has a low staff turnover with a stable friendly working environment. We are long established company, with job specific training as well as free on-site parking.

The job role is varied and its key parts would be:

- Calibrating electronic instrumentation to national standards
- Adjusting equipment to meet manufacturers tolerance specifications
- Working on a wide & diverse range of electronic equipment
- Interfacing with clients to resolve technical issues they may have
- Ownership of total work process, encompassing all aspects of ensuring client receives a quality product
- Recording work updates and procedures carries out with relevant certification

We are after someone with the following key skills:

- Good understanding of electronic principles
- Recognisable qualification are preferable but mandatory – experience will be taken into consideration
- Practical skills including soldering and using workshop equipment
- Attention to detail and ability for follow technical instruction
- Polite and courteous manner
- Work effectively under instruction and ability to prioritise tasks for the overall outcome
- Able to communicate with all levels of the business & work effectively in a likeminded technical team

The environment is light industrial with various workshops, and the candidate's job role requires working in both a workshop and calibration lab environment.

Terms: Permanent\* 40 hrs 8am – 4:30pm Mon-Fri. \*(subject to initial probation period)

Salary: Starting 00K - rising subject to applicant's proven skill set

Location : Norwich (NR6)

Job Ref: **WS\_IT\_1117**

Please send CV's with a covering letter to: **[jobs@nisltd.co.uk](mailto:jobs@nisltd.co.uk)**

## **Company background:**

**NORWICH INSTRUMENT SERVICES LTD** are a family run company, with continual expansion since 1997. We test and calibrate instrumentation, plant and hydraulic equipment working primarily in the electricity distribution industry. With existing long term contracts with large blue-chip clients and a reputation for excellent quality we are looking for outstanding individuals to join our team.
